#### GAME IS MIS-TAGGED... LOCAL CO-OP/MULTI-PLAYER ONLY

This game is tagged as both Multiplayer and Co-op, implying that it is possible to play online (since these tags are both distinct from Local Multi-player and Local Co-op). This is NOT the case - you can ONLY play with friends in the same room as you.

I'm sure the game isn't bad for what it is, and the brief time I have played was entertaining, but since I purchased two copies to play online with a friend I will be asking for a refund since the description is inaccurate.. Looks awesome, But Im stuck on "Connecting to load balance server" for ages..

But dont wanna give this a bad review because it looks better than fifa already, hope this fixes.. Faithful emulation of the original.. It's okay. There's a lot of detail but there is a C36 class that shouldn't be on Queensland Railway track! But every thing is okay.. Wow. This was an incredibly bad game. If you can even call it a game---the only mechanic was the click the same button over and over. The text itself sounded like it was written by someone who was having a stroke. There was no plot, or story, or anything. I can't believe I wasted my money on this. Also, this was clearly not written by someone who has experienced depression. The game suggested that depression can be cured by positive thinking and self-love. And, while that can sometimes help, IT DOES NOT CURE IT. I would NOT recommend this game to anyone.. The Celts felt like they should have been in this game from the start, just like most of the other culture packs that comes with Total War: Attila, Rome 2 & Warhammer. CA are just ripping content from their games now and selling it all seperatly, and as a final middle finger to us we get it at 6.99 unless its on sale which is ridiculous. However, playing as these 3 factions was very entertaining compared to most, because they have an excellent starting position being at the top of the campaign map. They also have some unique decisions to be made in the family politics, although that has little impact on the base game and feels like a weaker mechanic. The units here to feel a bit more unique, my preferred faction of the three was the Ebdanians (the irish) as they have an island to themselves which is easy to defend. The pict's and caledonians start off next to each other so playing as them a conflict is inevitable and you will be fighting the Western Roman Empire or the other celtic factions for the start of the campaign.

Final rating is a 2.5/5, but come on CA, enough of this unfair DLC already, stop cutting content.. Eh. Still better than MN9.

Overall I enjoyed my time with this game, the SNES style graphics, and music takes you on a nostalgia trip back to the glory days of gaming! There are a few technical issues with the game starting with the long load time(takes close to two minutes for me). Toward the end of the game I ran into a few code error messages, but not frequently enough to ruin my experience. The collision is also a bit suspect at times. I could go through a lot of walls that you are not meant to go through, and even suffered a few cheap deaths from falling through the ground. I also had a bit of trouble setting up my controller initially, I had to use JoyToKey to get it to work, since my Sabrent controller was not compatible at all; however that more likely an issue with the engine and not the game itself. These issues aside I really enjoyed the gameplay. There are a ton of secrets sprinkled throughout the land, and I had a lot of fun just getting lost and exploring. The combat is also pretty enjoyable too and you are given a nice variety of characters to adventure with!

Pros:

Nice graphics and music.  
Many Secrets to Discover.  
Good Variety of Characters.

Cons:

Long Load Time.  
A bit buggy with suspect collision and a few code error pop ups.  
Setting up controller was a bit of a hassle.. This a very self aware game...and flipn hilarious because of that...

SO please take the time to talk to everybody. I literally LOLd ....

I grew up with 8bit rpgs on Sega like Phantasy star and games like Final Fantasy on NES and this to that as Galaxy Quest was to Star Trek... A lampoon but in a weird way kinda better

The price is worth the few laughs I got from my choices alone and it places really smooth with that classic NES look...

Buy this its funny and good for a few laughs!. Get out your tape deck. Grab your fresh Dokken and Ratt cassettes and lets do dis.. Unforgiving Trials is a fun little old school RPG. The story is fairly simple, you recruit your fighters in an inn and march across the world to rid the land of corruption and evil. While the game is a bit linear, it offers a lot of choice in designing your party which I liked a lot. Some of the boss encounters might seem a bit difficult at first but if you make a strong team and prepare properly, you shouldn't have too much trouble. Also, dog and chicken are hilarious. Overall, I consider this game a good purchase, especially for such a low price.. Development has ceased, get it only if it's 90% off. Otherwise not worth it.. Geometry Dash, except that there is awful sound effects and music. The spike detection is really bad, and a lot of the jumps in the maps are poorly spaced and simply holding down your mouse button (NOT SPACE BAR) will desync yourself from the blocks you are jumping on. There are 9 levels in the game, but I haven't played them all. I got stuck on level 5 and gave up due to the awful spike detection. I got quite frustrated and so then I waited out my trading card drops (lol).

I do not recommend this.. Thin story, difficult, boring.. The game doesn't offer much more than the demo, so try to demo.
